# CECILIA MILAZZO

A Florentine designer, she graduated in 2006 in Fashion Design at the Faculty of Architecture in Florence as a project technician for jewelry accessories. Later she specialized in Design and began to work as a designer, product developer and lecturer in the field of jewelry and metalware for the fashion industry. In 2018, she won the “Brosway Jewelry Contest” with her “Pierce-ring” ring. Research and experimentation, tradition and innovation are the basis of her work.

## MOTUS ANIMI BRACCIALE

#Materials Gold-plated brass

The bracelet is part of the Motus Animi collection. It is one of the so-called kinetic jewels, mobile jewels with a hidden mechanism capable of performing an unexpected transformation that surprises and arouses an emotion: a “motus animi”. The rigid structure of the metal bracelet has eight synchronous adjustable flaps, making the jewel not only customizable but also a precious pastime for the wearer.

## MOTUS ANIMI SPILLA

gold-plated brass #Materials

The metal brooch is composed of two adjustable flaps that make the piece unique and original. The synchronous movement of the flaps allows a playful customization of the jewel. The brooch is an integral part of the Motus Animi collection and is considered a kinetic jewel: mobile jewels with a hidden mechanism capable of transforming shapes and colors, arousing an emotion, a “motus animi” in the wearer and the beholder.
